

PUBLIC NOTICE OF FINAL DECISION ON THE APPEAL
for the Hazardous Waste Facility Permit issued to

INDUSTRIAL SERVICE OIL COMPANY, INC.
1700 South Soto Street
Los Angeles, California 90023

On June 25, 2008, the Department of Toxic Substances Control (DTSC) issued the final decision on the Industrial Service Oil Company Inc. (ISOCI) permit appeal. The ISOCI facility permit is now effective except for the permit conditions that were deleted, stayed, or remanded by the Final Appeals Decision Order (Final Order).

- On December 18, 2006, DTSC issued a final permit decision to ISOCI for its existing operations and proposed expansion.
- In March 2007, DTSC received five (5) petitions appealing the final permit decision.
- On June 29, 2007, DTSC granted review for twenty (20) appeals comments and stayed the permit. In October, 2007, the Permit Appeals Officer received seven (7) briefing statements.
- On February 12, 2008, the Permit Appeals Officer held an Informal Appeals Conference at Resurrection Church Hall, 3360 Opal Street, Los Angeles, California 90023 and heard statements from affected parties concerning the appeals comments.

The twenty comments for which review was granted are listed at www.dtsc.ca.gov under Permit Appeals, in the document entitled "ISOCI Appeal Comments Granted Review." The same appeals comment numbers were used in the Final Order.

DTSC granted or partially granted comments 1-7, 3-1, 3-3, and 3-4. DTSC denied comments 1-9, 1-11, 1-12, 1-13, 1-16, 1-17, 1-20, 1-21, 1-22, 1-23, 1-26, 1-27, 1-28, 1-29, 1-30, and 3-2. The Permit Appeals Officer's analysis of the appeals comments and decisions concerning the final permit are provided in the Final Order.

The significant effects of this appeals decision are:

- ISOCI will not be able to use the rail car loading/unloading unit until ISOCI submits an amended engineering certification and it is approved by DTSC;
- ISOCI must analyze each shipment of used oil for PCBs, rather than analyzing only the full receiving tank;
- ISOCI must increase the amount of financial assurance for closure of the existing facility from approximately \$418,000 to \$1.5 million and provide \$124,000 for corrective action; and;
- The permit condition V.(2)u has been modified. The part of the condition that stated, "...the permit for the proposed units shall not become effective until the applicant is granted a local land use permit" has been deleted. The requirement that construction shall not begin on proposed units until all state and local permits have been obtained remains in effect.

The Final Order constitutes DTSC's final permit decision pursuant to California Code of Regulations, title 22, section 66271.18.

The Final Order is available at DTSC's website listed above and at the following repositories:
